Thank you Doug. The contamination south of Hempstead Turnpike is very important to MWD. This becomes even more important if Bethpage takes their wells offline. Please keep us posted as the DEC certainly doesn't. Thanks again.

Stan Carey, Superintendent
Massapequa Water District

Thanks for copying me Stan.

I hope you had a nice vacation.

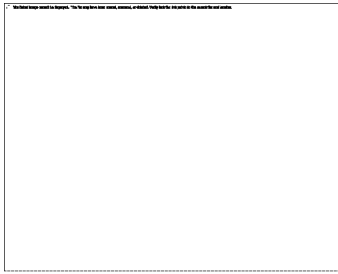

FYI. I did have separate follow up conversations with Richard Mach and Ed Hannon regarding the need to address the 500 ppb hit south of the Hempstead Turnpike and I think things continue to move in the right direction, but I would like to see a clean, clear commitment in the near future. Richard had been out on vacation and was still catching up when I spoke to him; we agreed to have a follow up call on the matter with Jim H. I have set up a call with Lora and Jim for Tuesday. We will further discuss this issue of and the status of the pilot work. Unfortunately, it does not appear as the BWD has been able to sign all the forms needed to make things happen. Jim and I will try to get more details on this from Lora and see whether there is any role we can play to get both sides over any administrative hurdles. This pilot looks to be a significant piece to understanding how to attack the plume, so hopefully we can figure out how to get it started soon.

Doug

Jim,
Please see the attached letter in response to the Trigger Value Report received last week from the Navy Consultant.
Thank you.

Stan Carey, Superintendent
Massapequa Water District
